

FOR IMMEDIATE RELEASE

**ENERDEL ANNOUNCES THREE-YEAR PRODUCT WARRANTY
ON ALL OF ITS STANDARD PACKS AND SYSTEMS**

*Superior Quality, Proven Technology & Manufacturing Expertise Allow
Company to Boost Warranty Higher than Industry Average*

INDIANAPOLIS (November 15, 2012) – EnerDel, Inc., a leading manufacturer of advanced lithium-ion batteries and energy storage systems, today announced that it will offer a full three-year product warranty on all of its standard packs and systems. Extending the product warranty further enhances EnerDel's industry-leading service, aftermarket and technical support, and assures customers that their applications will deliver the energy and power requirements they need.

"EnerDel's products have undergone extensive testing – through actual installed customer applications -- to verify their viability and reliability. The results give us the ability to boost our product warranty to three years," stated EnerDel CEO David Roberts. "The longer warranty, coupled with our recently-introduced Guaranteed Residual Value program, offers our customers the ability to reduce their total cost of ownership over the life of their application."

In addition to a three-year product warranty, EnerDel also offers an extended warranty and post-sale care through its service and maintenance programs. Since EnerDel products are designed to be easy to diagnose and service, any necessary repairs can typically be completed quickly and efficiently through EnerDel's global service team. EnerDel also offers product warranties for customers seeking customized battery and energy storage solutions.

"Our Assurance+ service and aftermarket programs -- including our new three-year standard product warranty -- give our customers even greater confidence that our energy storage solutions can address their power or energy needs over the long term," stated Tomasz Poznar, global services director, EnerDel. "Our global service team can handle everything from installation to spare parts, training, maintenance, re-use and recycling at any customer location worldwide. Our goal is to make using our packs and systems a worry-free experience."

About EnerDel

EnerDel, Inc. is a privately-held company headquartered in Indianapolis, Ind. It manufactures advanced, lithium-ion batteries and energy storage systems for electric utility, transportation and industrial applications. The company's prismatic cell design and modular stacking architecture combine to provide customers with production-ready solutions that address their power and energy storage needs.
